### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

***1.***

Claims 1,4,5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not properly enable fro the term “flip-flop phenomenon” used in claim 1, nor for “detouched vortex” in claims 4 and 5. While the applicant is permitted to be his own lexicographer, the specification must fully enable the use of terms that are not standard in the art.

***2.***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "at least one surface" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 3763

***Specification***

3.

The disclosure is objected to because of the following informalities:

Examiner believes that applicant intended to say "von Karman" vortices instead of 'Kalman' vortices throughout the specification.

Appropriate correction is required.

***Allowable Subject Matter***

4.

Claims 2, 3 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

None of the prior art of record discloses a fluid jet comprising 2 flat plates opposing each other wherein one of the plates has a smooth surface and the other has a series of x-shaped grooves.

***Conclusion***

5.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bartels et al. ('094) teaches a nozzle assembly comprising two plates (11,12) opposing each other wherein one plate has a plurality of channels.
